

Data Collection Wizard

Schedule Automatic Collection of T-BERT and T-TIMS Test Data

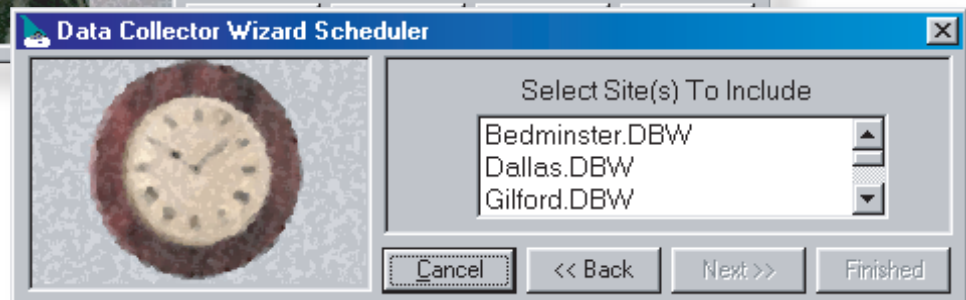

Create data collections schedules, identify data collection sites, and launch T-BERT and T-TIMS remote data collection from a centrally located computer.

Create a database of all your monitoring sites.

Create schedules to collect data from one or all your monitoring sites.

Talon Test Systems Data Collection Wizard expertly guides you through setting up a centrally located computer to collect T-TIMS and T-BERT test data from all of your remote monitoring sites. You can launch the schedule daily or use Data Collection Wizard in conjunction with TTS Scheduler for long term data collections.

into one ASCII file, view T-BERT data using T-BERT Data Analysis, view T-TIMS data using T-TIMS or delimit data files for further statistical analysis.

When you launch a schedule, Data Collection Wizard contacts the remote server and collects all data from a predefined repository. After all the data is collected you can: combine all data files
